

AIR CONDITIONER

RV UNDER BENCH

INVERTER AIR CONDITIONER

CARBONADO D2600

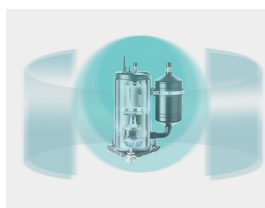

Carbonado D2600 is a brand new inverter under bench air conditioner developed by **ARANA**, adopting the latest DC inverter technology, running more smoothly with less vibration and lower noise, reliable performance and elegant appearance. Enjoy a comfortable RV life.

To combine the superior performance and appearance, and achieve value for money, is the only design principle for **ARANA** RV air conditioner.

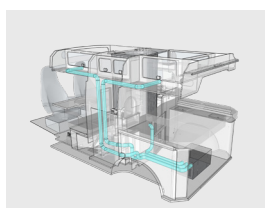

- Equipped with new DC inverter compressor, running with less vibration, low noise, efficient and quiet.
- Small and light, can be installed under the bunk or bench, without taking up extra space.
- With 3 air outlets, can be located anywhere to meet the different requirements of cooling or heating in different areas, to improve the comfort of RV life.

Description	CARBONADO D2600
Compressor type	DC inverter
Cooling capacity	2600W
Heating capacity	2600W + 500W
Rated input voltage	220 - 240V 50Hz
Consumption when cooling	4.4A
Consumption when heating	6.7A
Additional heating element	500W
Operation temperature	-5° C ~ 48° C
Refrigerant	R32
Refrigerant quantity	450g
Protection class	IPX5
Max length (recommended with insulated walls)	≤ 6m
Airflow	380m ³ /h
Fan Speed	3 levels
Dimension L x W x H	630 x 400 x 290mm
Weight	18.5kg

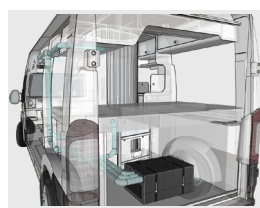

DC INVERTER COMPRESSOR

Low starting current, stable and quiet operation, high comfort, high efficiency and energy saving

EASY AND QUICK INSTALLATION

It can be installed under the bunk or bench without taking up extra space, without changing the layout of the vent or the roof, and without changing the external dimensions of the RV

SMALL AND LIGHT

Only 18.5kg super light weight, very quiet operation, very low noise

FREELY AIR OUTLET POSITION

3 air outlets can be located anywhere to meet the different requirements of cooling or heating in different areas, to improve the comfort of RV life
