RV CEILING FANS

RV CEILING FANS

- Electrical model: electrical lid lift and closing, manual mode and infrared remote control available.
- Manual model: improved worm and wheel structure to narrow the running gap and make lifting smoother. Knob locking function available to avoid wind leaking and noise whilst driving. Upgrade to electric model as optional (KIT upgrading).
- Intaking and exhausting function, bringing in fresh air and removing the hot musty air and odors. The unique plasma air purification function to make the inside air fresh.
- Temperature sensor, operating automatically according to the setting temperature.
- Rain sensor, closing in rainy days. Unique wind sensor function to make lid closed automatically in high winds or whilst driving at high speed to avoid damage.
- The unique closed design of motor support rod, increasing the structural strength, decreasing the structural damage, it can be used under the condition of low driving speed, and all the materials are with good quality of weather resistance.

- 485 interface (connecting with the vehicle central control system to achieve unified control).
- Internet remote control to achieve ventilation control at long distance by using APP on the phone.
- Easy to remove interior insect screen, no tools required.
- Added indoor shade and LED lighting panel, to solve shading problems and add lighting function practicably (a separate product, applicable for all fans in the market).
- Gas and carbon monoxide alarm function available, fans automatically run to discharge harmful gas from vehicle or reduce the density of harmful gas quickly to maximize air safety inside vehicle when induction service alarming.
- All-weather function package to achieve using in all conditions (moving, raining) , fanless ventilation and air circulation to lower temperature (KIT upgrading).

RV Ceiling Fan
T1000/T1150

Optional:

◆ Sunshade/LED lighting

Features:

◆ 6-speed fan;

◆ Manual lid lift/closing;

◆ Touch button;

◆ Intaking & exhausting;

◆ Ceiling fan;

◆ Removable insect screen;

◆ Silent operation with high air flow.
